Business Intelligence In the News: 2007

- 3/1: Oracle Announces Acquisition of Hyperion
- 3/14: IBM Announces Dynamic Data Warehouse Initiative
- 3/15: Gartner produces report on Msoft's BI Strategy for midmarket
- **4/10: IBM Announces IBM DB2 Web Query for System i**
- 4/24: HP Announces NeoView
- **9/18: IBM Starts Shipping DB2 Web Query**
- 10/7: SAP Acquires Business Objects
- 11/12: IBM Announces plans to acquire Cognos
- **12/31: IBM Ships close to 6000 licenses of DB2 Web Query and exceeds 10,000 downloads of the DB2 Web Query Redbooks**

The image shows two overlapping screenshots of web pages. The top screenshot is from the Cognos website, displaying a news article about IBM's acquisition of Cognos. The bottom screenshot is from the IBM System i website, featuring a headline about Arcadia's business intelligence capabilities with WebFOCUS and DB2 on System i, accompanied by a photograph of a modern building.

Beyond Query/400

IBM System i

Today's BI Requirements

- **Remove Dependency on IT for reporting purposes**
 - Ease IT backlog of reporting requests
 - **Parameterized Reporting**
 - Reduce Report Maintenance
 - Empower End Users
- **Client Independence**
 - Web Based
 - Reduce Software Maintenance
- **Multiple Viewing Options**
 - Dashboards/Scorecards
 - Spreadsheet Integration
 - Static Reports/Intelligent Bursting
 - Report Archival
- **Operational or Data Warehouse**
 - Real time or Historical Reporting
- **Secure the Data**
 - Avoid Data replication
 - Adhere to compliance requirements

Beyond Query/400

IBM System i

IBM DB2 Web Query for System i Powered By Information Builders

- **5733-QU2 V1R1 Available 9/14**
- Base Program Product Includes:
 - i5/OS Web Reporting Server
 - Several Web Based authoring tools
 - RA, GA, Power Painter
 - Query/400 (5722-QU1)
 - Web Enable Query/400 Reports
 - Unlimited users
 - **BASE PRODUCT OFFERED AS NO CHARGE UPGRADE FROM QU1**
 - Does not include Software Maintenance
 - Includes handful of user licenses based on tier

<http://www.ibm.com/systems/i/db2/webquery>

- Additional Features
 - Additional Named Users
 - Active Reports (Disconnected Analysis)
 - On Line Analytical Processing
 - Requires Meta Data provided with Developer Workbench
 - Developer Workbench
 - IT Tool for meta data

i want an i.
© 2007 IBM Corporation

IBM System i

DB2 Web Query Enhancement

- New Run-Time User License Enablement Feature
 - New Flexible Pricing option
 - Can now define a single user license as either a:
 - Report "Author"
 - Can create/edit reports with web based tools
 - Synonymous with a Named User as known today
 - Run Time Only Group of Users
 - Can only run reports
 - Can Group multiple users into a single license
- Significantly reduced prices for scenarios with large set of run-time users

Named User Pricing

Tier	Number of Named Users	Price*
P05	40	\$15,200
P10	80	\$32,000
P20	150	\$57,600

New Run Time Pricing

Tier	Number of "Authors"	Number of Run Time Groups	Price*
P05	4	5	\$6,000
P10	4	10	\$10,400
P20	8	20	\$23,200

US list prices, subject to change without notice
 *Assumes upgrade into QU2 from QU1

i want an i.

Beyond Query/400

IBM System i

Run Time User Enablement Feature (DB2 Web Query Opt. 4)

- Enablement feature licensed to SERVER
 - Provides ability to define user LICENSES as either
 - Report Authors (named "developers")
 - A Group of Run Time Only (can only execute reports, but can execute concurrently)

↓ *NEW*

Tier	QU2 Base Server License (includes QU1)	Included Users	Additional User (Author or group run-time)	Run-time User Enablement Feature
P05	\$1,600	2	\$400	\$3,200
P10	\$3,200	4	\$400	\$6,400
P20	\$9,600	6	\$400	\$9,600
P30	\$19,200	8	\$400	\$19,200
P40	\$28,800	10	\$400	\$28,800
P50	\$38,400	15	\$400	\$38,400
P60	\$48,000	20	\$400	\$48,000

What is Different about DB2 Web Query

- Single Server Solution
 - Simpler Software Maintenance
 - Multiple functions in single OS/server
 - OLAP, Report Writer, Web Server, Meta Data, Database
 - Simpler Licensing
- Vertical Scalability
 - Grow without Disruption
- Start Small, Grow Big
 - DB2 Web Query provides FOUNDATION
 - Add additional features per requirements
- Security/Auditability
 - All the data in ONE PLACE
 - No Viruses, No "Patch Tuesday"
- DB2 Query Optimization
 - Patented IBM Technology
 - SQE vs. CQE (Query/400)
- Simplified Data Access
 - No Data Replication Required

IBM System i

Graphing Assistant

The Graphing Assistant interface shows a list of available fields on the left, including IN_ORDERS, ORDERNUMBER, PRODUCTNUMBER, STORECODE, ORDERDATE, SALESREP, QUANTITY, LINETOTAL, COSTOFGOODSOLD, RETURNS, WARRANTYEXP, SHIPWECOST, I2_INVENTORY, PRODUCTNUMBER, PRODUCTTYPE, PRODUCTCATEGORY, and PRODUCTNAME. The 'Field selection' tab is active, showing 'Selected field display options' with 'PRODUCTTYPE' on the X-axis and 'LINETOTAL' on the Y-axis. A 'Field options' dialog box is open for 'PRODUCTTYPE', showing 'Sorting order' as 'Ascending'.

Revenue by Product Type
Plant comparison

The bar chart displays revenue for various product types across different plants. The Y-axis represents revenue from 0 to 3,200,000,000. The X-axis lists product types: Audio, Camcorders, Cameras, Office, and Video. The legend indicates different line totals for various plants: Line Total: BOS, Line Total: DAL, Line Total: LA, Line Total: ORL, Line Total: SEA, and Line Total: STL.

IBM System i

Import Query/400 Definitions

The Import Query/400 Definitions interface shows a table of data with columns: Country, Product Type, Product Category, Store Name, and Line Total. The data is organized into a hierarchical structure, with 'Canada' as the primary category, followed by 'Audio', 'Camcorders', 'Cameras', 'Office', and 'Video'. A red arrow points from the table to the 'Store Revenue by Product' report.

Store Revenue by Product

Country	Product Type	Product Category	Store Name	Product Type	Line Total
Canada	Audio	Amplifiers/Phono/Tuners	ABC Electronics	Audio	3,324,489.00
		Home Audio Outfitters	ABC Electronics		1,415,214.00
		Flair/Digital	ABC Electronics		54,145.00
		Wingsong Audio	ABC Electronics		262,517.00
		ABC Electronics	ABC Electronics		12,000,000.00
		Home Audio Outfitters	ABC Electronics		1,259,104.00
		Flair/Digital	ABC Electronics		980,872.00
		Wingsong Audio	ABC Electronics		865,209.00
		ABC Electronics	ABC Electronics		4,270,449.00
		Home Audio Outfitters	ABC Electronics		737,463.00
		Flair/Digital	ABC Electronics		1,185,572.00
		Wingsong Audio	ABC Electronics		397,070.00
		ABC Electronics	ABC Electronics		3,436,481.00
		Home Audio Outfitters	ABC Electronics		710,060.00
		Flair/Digital	ABC Electronics		1,160,700.00

IBM System i

Active Reports: Disconnected Support

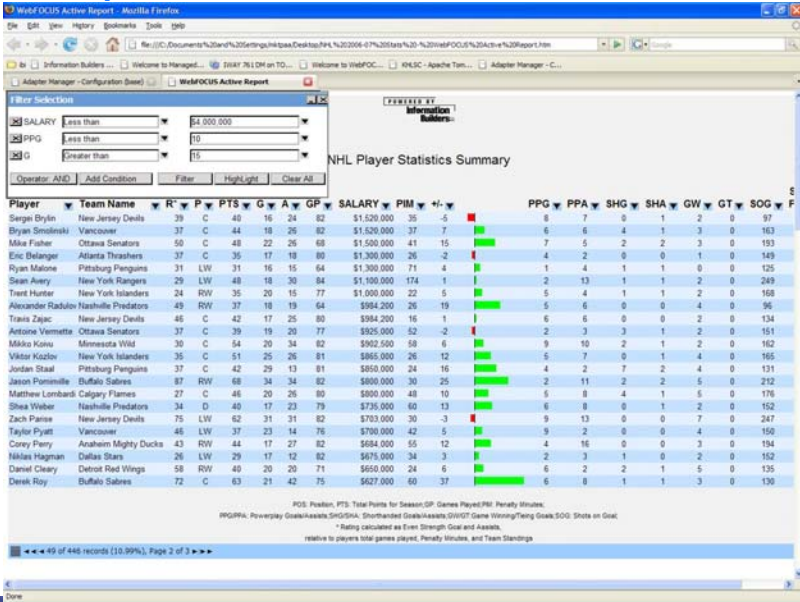

- Self-contained analytical reports
 - Delivered to users via email or browser
- Users interact with the data on the report w/o being connected to infrastructure
- Intuitive built-in controls
 - Sorting, Filtering, Visualization, Charting, Dynamic Roll-ups
 - Export to HTML, CSV or Excel
 - Export Charts to Word, Excel, or PowerPoint
- Great for mobile sales reps and other users that are not connected or defined to the System i

Development priorities for DB2 Web Query*

- Improved Batch reporting and automated report distribution
 - Automated scheduling of batch reports with additional output options and automated report distribution
- Software Development Toolkit
 - Enables embedding of report execution within application/portal
 - Over 25 ISVs have already asked for this
- DB2 Web Query Data Connectors (Name may change)
 - Features for:
 - SQL Server
 - JDBC (any DBMS Type 4 JDBC driver can allow for reports to access other DBMS's)
 - JDE (first ERP adapter we will deliver as part of IBM product)
 - Product Vehicle for future Adapter Support
 - SAP, Lawson/Intentia, Infor, Domino, SPSS Adapters being assessed
- Improved Excel Integration
 - “pull” data (vs. current “push” approach)
- Other improvements
 - Additional NLS Support, HTTPS/SSL, etc.

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Installation of DB2 Web Query

- Base product:
 - RSTLICPGM LICPGM(5733QU2) DEV(OPT01)
- Active Reports was purchased
 - RSTLICPGM LICPGM(5733QU2) DEV(OPT01) OPTION(1)
- OLAP Enablement option
 - RSTLICPGM LICPGM(5733QU2) DEV(OPT01) OPTION(2)
- Developer Workbench
 - RSTLICPGM LICPGM(5733QU2) DEV(OPT01) OPTION(3)
- Read and press F14 to accept the license.
- Load and apply the latest 5733QU2 PTFs, informational APAR II14318.
- CALL QWEBQRY76/REGWEBQRY // Register the DB2 Web Query HTTP instance.
- User profile QWEBQRYADM created at 1st installation

i want an i.

© 2007 IBM Corporation

IBM System i

IBM

Registering Named Users

- **Registering Named Users.**
 - CALL QWEBQRY76/WQADDLIC 'USERPROFILE'
 - USERPROFILE references your System i user profile name and must be specified in upper case letters.
- **Removing a DB2 Web Query registration**
 - CALL QWEBQRY76/WQRLSLIC 'USERPROFILE'
 - Again your user profile needs to be in upper case.
- **Displaying registered users**
 - WRKLICINF PRDID(5733QU2), option 8 for #5050
- **User Categories**
 - Administrator (MRADMIN), Developer (MDMONTHEND), basic User (MUMONTHEND)
- **Named user**
 - I5/OS user (defined by user profile), registered to use the product
 - User must be "named" user to build and to execute queries against DB2
 - Viewing a report (excel or pdf): no named user required , creating report (pdf or excel): Named user required

IBM DB2 for i/OS Home Page

DB2 for i/OS is an advanced, 64-bit relational database management system (RDBMS) that leverages the 64-bit General Purpose Architecture (GPA) of the System i architecture. DB2 for i/OS is a member of IBM's leading edge family of DB2 products. DB2 for i/OS supports a broad range of applications and development environments at a low cost of ownership due to its unique patented templating capabilities.

Advanced Computing Features

The next generation of DB2 for i/OS provides unique attributes to this 64-bit, single user, 32-bit and 64-bit based operating system. DB2 for i/OS supports the ability to manage the database, while maintaining the performance, reliability and security. Automation of many of the common database management (DBM) tasks required to other DB2's and its components of DB2 for i/OS, such as the database, provides these features to the user. DB2 for i/OS provides a wide range of features to the user, including the ability to manage the database, while maintaining the performance, reliability and security.

Open Development Environments

DB2 for i/OS is designed to support many different development environments. It provides a wide range of features to the user, including the ability to manage the database, while maintaining the performance, reliability and security. DB2 for i/OS is designed to support many different development environments. It provides a wide range of features to the user, including the ability to manage the database, while maintaining the performance, reliability and security.

Availability

DB2 for i/OS provides an on-demand architecture of System i, including Dynamic Logical Partitioning and On-Demand Capacity Upgrade on Demand to help and easily support the changing needs to reduce business complexity in a dynamic environment. DB2's sophisticated data-based query

Information is provided "AS IS" without warranty of any kind.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only. Contact your local IBM office or IBM authorized reseller for the full text of the specific Statement of Direction.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Photographs shown are of engineering prototypes. Changes may be incorporated in production models.
